Color Flow Hierarchy

Level	Type	Description	Implementation
Level 1	Universal Colors	Never change across themes	Success, Error, Warning, Info, Rating
Level 2	Theme Base Colors	Change per theme mode	Background, Surface, Primary Accent
Level 3	Component Colors	Inherit from theme base	Text colors, borders, specific backgrounds
Level 4	State Colors	Interactive variations	Hover, focus, active, disabled states

Usage Guidelines

Guideline	Description	Implementation
Consistency	Universal colors remain the same across all themes	Use CSS custom properties for universal colors
Accessibility	Maintain proper contrast ratios	Test all color combinations for WCAG compliance
Hierarchy	Follow the 4-level color hierarchy	Implement cascading color inheritance
Performance	Use CSS custom properties for efficient theme switching	Minimize repaints during theme transitions
